Power

the magazine of ENERGY SYSTEMS ENGINEERING

EDITORIAL INDEX

Volume 110, January – December

1966

McGraw-Hill, Inc.
330 West 42nd Street
New York, N.Y. 10036

A

AIR COMPRESSORS, SYSTEMS
- Air compressor controls boost system efficiency—New goals in automation report. W. W. Paschke (charts) ....Oct.— 94
- How can I troubleshoot our hermetic compressors?—Energy system problem Apr.—178
- How we deflection test our large compressors. S. V. Subbarao (P.I.) .....May—176
- Linde's air separation plant puts accent on system reliability. Gunnar Fog (chart) .....Aug.— 74
- Napkins to the rescue—improvised filters maintain oil-free air. L. J. Cormack (P.I.) .....Apr.—182
- Seat refacer avoids removing gas compressor cylinder. M. L. Leekha (P.I.) Dec.—168

AIR CONDITIONING
- Air-conditioning control—8-page TD report. F. P. Sullivan (charts) ....Sept.—193
- Equipment and design aids roundup Oct.—150
- How can I troubleshoot our hermetic compressors?—Energy system problem Apr.—178
- 1966 Energy Systems Design Survey (charts & tables)
  - Industrial plants lead in total system capacity .....Oct.—S 33
  - Design features .....Oct.—S 34
- Preventing water backup when chiller freezes. W. Davis (P.I.) .....Sept.—176

AIR POLLUTION CONTROL
- Manganese additive reduces SOs in flue gases. A. R. Belyea (chart) .....Nov.— 80
- New York City's tough new air pollution bill, and what it may mean to you. Steve Elonka .....Aug.— 71
- Smoke tracking helps determine optimum chimney height. A. G. Kelly (chart) June— 94
- Stack emissions—LILCO trims residual oil problems. L. M. Exley & others (charts) .....Apr.— 69
- Standards for pollution-control: an engineering challenge (Ed.) .....Feb.— 63
- Switzerland's Vouvry Station: an unusual approach to air pollution control. R. J. Bender .....Dec.— 83

ATOMIC POWER
- Central station design—32-page special report. R. K. Evans (charts & tables) Dec.—S 1
  - Do economics favor nuclear power Dec.—S 2
  - Nuclear generation reaches for new goals .....Dec.—S 14
  - Nuclear energy wins close to 25% of central units above 500 mw (table) Dec.—S 31
- Equipment and design aids roundup Oct.—242
- How Duke Power trains design and operating engineers for its nuclear Keowee-Toxaway Project. Steve Elonka (chart) Dec.— 79
- Locating nuclear power plants in cities is now feasible, experts agree .....June— 82
- Nuclear energy: a new balance (Ed.) Sept.— 71
- Nuclear notes. R. J. Bender .....Jan.— 72 Feb. 92, Mar. 74, Apr. 94, May 92, June 98, July 78, Aug. 96, Sept. 98, Oct. 103, Nov. 96, Dec. 100
- Temperature-enthalpy diagram helps analyze nuclear reactor steam systems. D. E. Lutz (charts) .....Aug.— 76
- Turbine pressure governor controls reactor system temperatures at Argonne National Laboratory. D. E. Lutz (charts) Jan.— 59

B

BEARINGS
- Lubricants — 16-page special report, reprinted from Aug., 1962. J. J. O'Connor (charts & tables) .....Aug.—191
- No more $$$ for bearing failures. R. A. Foltz (P.I.) .....Apr.—180
- Reduced clearance stops bearing failure. L. J. Cormack (P.I.) .....Dec.—169

BOILERS
- Baffle plates can cure boiler vibration. Dean & Cohan (charts) .....Feb.— 82
- Casings need not corrode. W. A. Haase (P.I.) .....June—221
- Correct water treatment can minimize caustic stress corrosion. Henry Suss (chart) .....Mar.— 54
- Economizer preheat cycle raises boiler plant efficiency. Milton Meckler (chart) Feb.— 84
- Exhaust heat boilers add to gas turbine efficiency. D. O. Watts (chart) ..July— 55
- High-voltage electric boilers supply district steam to downtown Toronto. Sinoski & Creighton (chart) .....Nov.— 84
- How long can a boiler operate unattended?—Energy system problem ....Jan.—122
- How we converted to burn wood waste. W. R. Pender (P.I.) .....Dec.—170
- Insurance—boiler and machinery insurance. W. H. Johnston .....Feb.— 76
- Large field-erected boiler moved on skids Nov.— 81
- Low excess air and sonic atomization team up. R. J. Bender (chart) ...July— 71
- 1966 Energy Systems Design Survey (charts & tables)
  - Central power stations—unit size continues to grow .....Oct.—S 4
  - Design features .....Oct.—S 6
  - On-site generation .....Oct.—S 11
  - Steam systems—larger, higher pressure boilers reflect optimistic industrial planning .....Oct.—S 24
  - Design features .....Oct.—S 26
  - Industrial turbines get bigger ...Oct.—S 32
- One boiler does two jobs. J. S. Miller (P.I.) .....Dec.—170
- Optimize sootblowing frequency in utility boilers. J. C. O'Brien (chart) ....May— 78
- Safety valves can be made safer. Dowies & Garner (chart) .....Sept.— 92
- Sootblower maintains controlled deflection throughout 55-ft. travel .....May— 79
- Stop valve below safety valve? L. J. Cormack (P.I.) .....May—177
- Safety valve again. . . . A. A. Arena, A. L. Kohan (P.I.) .....Aug.—172

C

CENTRAL POWER STATIONS
- Bay d'Espoir gets packaged unit to provide interim base-load power .....Apr.— 80
- Central station design—32-page special report. R. K. Evans (charts & tables) Dec.—S 1
  - The spectacular story of size ....Dec.—S 2
  - Site selection—new factors .....Dec.—S 6
  - How steam generators meet today's demands .....Dec.—S 10
  - Nuclear generation reaches for new goals .....Dec.—S 14
  - Turbine design evolves to match steam conditions .....Dec.—S 18
  - Automatic control: how far and how fast? .....Dec.—S 22
  - Plant auxiliaries match size with reliability .....Dec.—S 26
- Con Edison's Ravenswood Generating Station checks water quality at every step. Peri & Bogen (chart) .....Jan.— 53
- Fire protection for power plants. D. E. Glass .....Feb.— 86
- Gulf States Utilities' Willow Glen station plans multi-computer system for unit control. R. K. Evans (charts) ....Apr.— 74
- LILCO trims residual oil problems. L. M. Exley & others (charts) .....Apr.— 69
- Nevada Power's Reid Gardner station—coal-fired boiler control .....Oct.— 91
- 1966 Energy System Design Survey (charts & tables)
  - Unit size continues to grow; problems of fuel and water supply grow, too Oct.—S 4
  - Design features .....Oct.—S 6
  - Computer installations .....Oct.—S 10
- Optimizing sootblowing frequency in utility boilers. J. C. O'Brien (chart) ..May— 78
- Pumps—an 8-page TD report. R. H. Marks (charts) .....Feb.—177
- Rockville Center, N.Y. power plant shows how to cut operating costs. T. F. Gerrety .....July— 58
- San Antonio, Texas PS Board's Victor Braunig Power Plant Unit No. 1 chooses battery-inverter system to provide power in emergencies. Pflieger & Grifith (chart) .....Dec.— 90
- Sweden's Marviken plant—computers at work in steel and power .....Oct.— 88
- Switzerland's Vouvry Station: an unusual approach to air pollution control. R. J. Bender .....Dec.— 83
- TVA's Paradise plant will have 40 sootblowers, including the retractable Diamond unit .....May— 79
- Union Electric's Labadia, Mo., plant chooses coal over nuclear energy (Ed.) Sept.— 71

CIRCUIT BREAKERS
- Clear l-v ground faults with solid-state trips. Bailey & Heilmann (chart & tables) .....Mar.— 69
- Test low-voltage circuit breakers and motor controls with high current. Norman Peach (charts) .....Feb.— 79
- When do you use fused interrupters instead of metal-clad switchgear? ..May— 86

COAL AND ASH HANDLING
- Air pollution see **Air Pollution Control**
- Computers at work in steel and power—coal-fired boiler control at Reid Gardner station .....Oct.— 91
- Dust collecting—how maintenance $$$ can give you a "new" mechanical dust collector. R. E. McCarty .....Feb.— 72
- How can we stop coal sticking to bunker walls?—Energy system problem ..Mar.—152
- New York City's tough new air pollution bill, and what it may mean to you. Steve Elonka .....Aug.— 71

COMBUSTION
- Low excess air and sonic atomization team up. R. J. Bender (chart) ....July— 71
- Manganese additive reduces: SOs and improves combustion. A. R. Belyea (chart) Nov.— 80

COMPUTERS
- Air conditioning control: on-line computerized control gains interest—8-page TD report. F. P. Sullivan (charts) Sept.—193
- Automation: what's in it for me? (Ed.) Oct.— 75
- Is your electric power good enough—how momentary disturbances affect computers (charts & table) .....July— 62
- Maintenance Conference updates PM thinking. Steve Elonka (table) ...June— 79
- Multi-computer system for unit control at Willow Glen Station. R. K. Evans. (charts) .....Apr.— 74
- New goals in automation—24-page special report (charts) .....Oct.— 79
- Computers analyze building loads. F. P. Sullivan .....Oct.— 81
- The computer—versatile design aid. R. K. Evans .....Oct.— 85
- Computers at work in steel and power Oct.— 88
- Automatic water quality measurements. R. H. Marks .....Oct.— 92
- Air compressor controls boost output. W. W. Paschke .....Oct.— 94
- Computer needs: available power and freedom from noise. Norman Peach Oct.— 98
- How far can power plants be automated? R. J. Bender .....Oct.—101
- 1966 Energy System Design Survey—Central station computers. R. K. Evans (table) .....Oct.—S 10

CONDENSERS, STEAM
- Large surface condensers benefit from new welding techniques. Sirois & Hartsell (tables) .....Sept.— 79

CONSTRUCTION
- Conduit bender solves footing problem. L. J. Cormack (P.I.) .....Sept.—174
- Ferryboat becomes movable field office and construction shop .....Aug.— 93

Controls see Instruments and Controls

COOLING TOWERS
- Six ways you can increase cooling tower capacity. C. J. McCann (tables) ..May— 67
- Why did our large cooling-tower pumps keep failing? L. J. Cormack (P.I.) June—220

CORROSION
- Boiler casings need not corrode. W. A. Haase (P.I.) .....June—221
- Correct water treatment can minimize caustic stress corrosion. Henry Suss (chart) .....Mar.— 54
- Diesel starting fluid is good penetrant. L. J. Cormack (P.I.) .....July—148
- Heat exchanger corrosion: how can we overcome it?—Energy system problem Mar.—154
- How to protect condensate tanks against corrosion—cathodic protection systems. Applegate & Applegate .....Mar.— 59
- LILCO trims residual oil problems. L. M. Exley & others (charts) .....Apr.— 69
- New alloys resist fuel oil corrosion in modern furnaces. W. D. Mogerman (chart) .....Aug.— 81
- What caused corrosion in our condensate lines? L. H. Bauer (P.I.) .....Mar.—158
- Why did our coils fail? L. J. Cormack (P.I.) .....Feb.—156

D

DATA SHEETS (A DEPT.)
- Air heater calculations. Salva & Cruil (nomogram) .....Apr.— 96
- Annulus equivalent diameter for heat transfer. F. Caplan (chart) .....Jan.— 75
- Coil-spring calculations. R. Brunner (nomogram) .....Sept.—101
- Critical flow rates of gases. R. H. Cushing (nomogram) .....Mar.— 76
- Placing slide rule decimals. B. A. Birch June—100
- Power factor of balanced 3-phase systems. F. Caplan (nomogram) .....Oct.—106
- Quickly convert between centigrade and Fahrenheit. Sidney Austin .....Nov.— 98
- Radiant heat transfer between walls. F. Caplan (chart) .....July— 80
- Resistance of electric conductors. R. Brunner (chart) .....May— 95
- Rpm vs. sheave size. J. D. Constance (nomograph) .....Feb.— 94
- Saturated steam flow in pipes. F. Caplan (nomogram) .....Dec.—102
- Viscosity conversion chart. H. W. Hamm (chart) .....Aug.— 99

E

ECONOMICS

Central station design—32-page special report. R. K. Evans (charts) ...Dec.—S 1
Developing nations pose challenges for energy-systems engineers. Steve Elonka Nov.— 73
Economizer preheat cycle raises boiler plant efficiency. Milton Meckler (chart) Feb.— 84
Gas turbines can show significant economy driving pumps and fans. J. A. Kozlowski (tables) ....Sept.— 82
Increase gas turbine capability to reduce your plant costs. Hiniker & Wilson (charts) ....Apr.— 78
Machinery relocation benefits both seller and buyer ....Mar.— 68
Municipal power plant shows how to cut operating costs. T. F. Gerrety ....July— 58
New goals in automation—24-page special report (charts) ....Oct.— 79
Computers analyze building loads—Westinghouse computer program estimates comparative costs. F. P. Sullivan ....Oct.— 81
How far can power plants be automated? R. J. Bender ....Oct.—101
Operating savings make on-site generation an attractive investment. M. Olchoff (charts & tables) ....Apr.— 88
Pumped storage hydro: new plants produce competitive peaking power—8-page TD report. R. K. Evans (charts & table) ....May—191
Steam turbines cut plant operating costs. R. K. Evans (table) ....Mar.— 56
Three-bed demineralizing is optimum arrangement. Heatherington & Downing (charts & tables) ....Nov.— 78
What price reliability of equipment and plants? I. J. Karassik (charts & tables) Apr.— 81
Yugoslavia believes in industrialization. R. J. Bender (map & table) ....Dec.— 96

EDITORIALS

An engineer speaks out on pollution Dec.— 75
Automation: what's in it for me? ..Oct.— 75
Engineer or technician? ....Apr.— 65
Ethics in advertising ....Mar.— 47
Europe: personal impressions ....June— 75
Gas turbines—international ....May— 63
How to downgrade engineering ....Aug.— 67
New frontiers for energy ....July— 51
November 9th: one year later ....Nov.— 69
Nuclear energy: a new balance ....Sept.— 71
Pollution-control standards: an engineering challenge ....Feb.— 63
Steps toward firm power supply ...Jan.— 49

ELECTRIC GENERATION

Asynchronous machines get wider use. B. G. Waurick (charts) ....Aug.— 88
Availability of power and freedom from noise are key computer needs—New goals in automation report. Norman Peach (charts) ....Oct.— 98
Battery chargers can be m-g sets, rectifiers. Norman Peach (charts) ....Jan.—120
Bay d'Espoir gets packaged gas-turbine generator to provide interim base-load power ....Apr.— 80
Carbon brushes — know your carbon brushes for longer life and better service. W. E. Heath (charts) ....July— 68
Central station design—32-page special report. R. K. Evans (charts) ....Dec.—S 1
Electric generators—24-page special report. F. P. Sullivan (charts) ....Mar.—S 1
Fundamentals of generating electricity Mar.—S 2
Generators for steam and gas turbine drives ....Mar.—S 5
Generators for hydro stations ..Mar.—S 14
Packaged generators ....Mar.—S 18
Dc generators ....Mar.—S 23
Tips on selection and operation .Mar.—S 24
Electric testing. Norman Peach (charts)
Pt. VII Test low-voltage circuit breakers and motor controls with high current ....Feb.— 79
Pt. VIII Corona tests reveal hidden trouble ....Apr.— 85
Equipment and design aids roundup Oct.—206
Examine starting of large motors when you plan on-site generation. J. E. Doescher (charts) ....Sept.— 88
Here's what I did during the BLACKOUT (P.I.) E.D.—Feb. 158, E. Schirmer—Apr. 182, L. A. Buchalter—June 222, A. W. Lovitt—Sept. 176, B. A. Shuttleworth—Nov. 164B
How should I schedule maintenance for our standby generator set?—Energy system problem ....May—172
Increase gas turbine capability to reduce your plant costs. Hiniker & Wilson (charts) ....Apr.— 78
New frontiers for energy—India's symposium on energy-systems engineering (Ed.) ....July— 51
1966 Energy Systems Design Survey (charts & tables) ....Oct.—S 1
Central stations ....Oct.—S 4
On-site generation ....Oct.—S 11
Gas turbines ....Oct.—S 14
Oil and gas engines ....Oct.—S 17
Steam systems ....Oct.—S 24
Steam turbines ....Oct.—S 32
Air conditioning ....Oct.—S 33
Electric distribution ....Oct.—S 40
Northeast Blackout—November 9th: one year later (Ed.) ....Nov.— 69
Northeast Blackout—one year later. F. P. Sullivan ....Nov.— 88
Northeast Blackout triggers plan for firm power supplies—8-page TD report. J. J. O'Connor (charts & map) ....Jan.—141
On-site generation—operating savings make on-site generation an attractive investment. M. Olchoff (charts & tables) Apr.— 88
Pumped storage hydro: new plants produce competitive peaking power.—8-page TD report. R. K. Evans (charts & table) ....May—191
Resistor burns out—what would you have done? R. E. Ethridge ....June—221
Steps toward firm power supply (Ed.) Jan.— 49
Turbine-generator moves to Venezuela—machinery relocation benefits both seller and buyer ....Mar.— 68
What causes our stator winding failures?—Energy system problem ....Feb.—152
What price reliability of equipment and plants? I. J. Karassik (charts & tables) Apr.— 81
Why did our generators go off line? L. H. Bauer (P.I.) ....Jan.—126
Yugoslavia believes in industrialization. R. J. Bender (map & table) ....Dec.— 96

ELECTRIC POWER DISTRIBUTION

Batteries—maintain batteries in top condition. Norman Peach ....Mar.—148
Battery-inverter system protects Victor Braunig Power Plant Unit No. 1 in emergencies. Pflieger & Griffith (chart) Dec.— 90
Clear l-v ground faults with solid-state trips. Bailey & Heilmann (chart & tables) ....Mar.— 69
Does this neutral bus make a proper equipment ground? — Energy system problem ....Sept.—170
Equipment and design aids roundup Oct.—214
How do we predict voltage drop?—Energy system problem ....June—216
How starting large ac motors can cause severe voltage dips. J. E. Doescher (charts & tables) ....Feb.— 69
Is your electric power good enough?—how momentary disturbances affect computers, other electronic equipment (charts & table) ....July— 62
Junction box made in odd shape. L. J. Cormack (P.I.) ....July—148
Light bulbs KO maintenance problem and are kept as permanent equipment. L. J. Cormack (P.I.) ....Mar.—156
1966 Energy Systems Design Survey (charts & tables)
Today's designers are using these solutions to get more reliable and efficient systems ....Oct.—S 40
Design features ....Oct.—S 42
Northeast Blackout—November 9th: one year later (Ed.) ....Nov.— 69
Northeast Blackout—one year later. F. P. Sullivan ....Nov.— 88
Northeast Blackout triggers plans for firm power supplies—8-page TD report. J. J. O'Connor (charts & map) ..Jan.—141
Power factor of balanced 3-phase systems, F. Caplan (nomogram) ....Oct.—106
Resistance of electric conductors. R. Brunner (Data Sheet) (chart) ....May— 95
Steps toward firm power supply (Ed.) Jan.— 49
Transformers—8-page TD report. Norman Peach (charts) ....Nov.—181
Transformers—correctly connect transformers. Lloyd McWilliams ....May— 80
Volts too weak? L. J. Cormack (P.I.) June—220
When do you use fused interrupters instead of metal-clad switchgear? ..May— 86

ELECTRIC SYSTEM FILE (A DEPT.)

Ac instruments are usually moving-iron vane designs ....Sept.—164
Chargers can be m-g sets, rectifiers Jan.—120
Dc instruments can be modified for ac measurements ....July—140
Electrodynamic ac instruments have high accuracy ....Nov.—156 D
Maintain batteries in top condition Mar.—148
Moving coil unit is a basic instrument. May—168

ELECTRONICS

Air conditioning control: on-line computerized control gains interest.—8-page TD report. F. P. Sullivan (charts) Sept.—193
How electric power system disturbances affect electronic equipment—Is your power system good enough? (charts & table) ....July— 62
Protect automated plants from fire. D. E. Glass ....Feb.— 86
Rectifiers and inverters are now based on solid-state devices (chart) ....Jan.— 56
Solid-state trips clear l-v ground faults. Bailey & Heilmann (chart & tables) Mar.— 69

ELEVATORS AND ESCALATORS

Blackout stalls elevator—what I did during the BLACKOUT. E. D. (P.I.) Feb.—158

ENERGY SYSTEM PROBLEMS (A DEPT.)

Can I control superheater temperature with saturated steam? ....Sept.—168
Does this neutral bus make a proper equipment ground? ....Sept.—170
How can I troubleshoot our hermetic compressors? ....Apr.—178
How can we avoid unnecessary air preheating? ....Aug.—168
How can we overcome heat exchanger corrosion? ....Mar.—154
How can we prolong demineralizer resin life? ....Dec.—164
How can we stop coal sticking to bunker walls? ....Mar.—152
How do we predict voltage drop? ..June—216
How long can a boiler operate unattended? ....Jan.—122
How should I schedule maintenance for our standby generator set? ....May—172
What causes our stator winding failures? Feb.—152
What causes our turbine blade failures? June—214
Why do we lose condensate? ....Nov.—158
Why won't our centrifugal pump drain the tank? ....July—144

ENGINEERING PROFESSION

Developing nations pose new challenges for energy-systems engineers. Steve Elonka ....Nov.— 73
Engineer or technician? (Ed.) ....Apr.— 65
Ethics in advertising (Ed.) ....Mar.— 47
Europe: personal impressions (Ed.) June— 75
How to downgrade engineering. (Ed.) Aug.— 67
Placing slide rule decimals. B. A. Birch (Data Sheet) ....June—100
Pollution-control standards: an engineering challenge (Ed.) ....Feb.— 63

ENGINES, INTERNAL COMBUSTION

Cracked crankshaft—what would you have done? L. J. Cormack (P.I.) Jan.—127
Diesel engine trouble shooting—train your senses to detect troubles. E. E. Kidman (chart) ....Nov.— 82
Filters for diesel-generator oil—napkins: latest American invention. Eugene Gore (P.I.) ....Aug.—172
Look at the record before changing diesels to residual fuel. W. T. Dupler Feb.— 67
1966 Energy Systems Design Survey (charts & tables)
Electric generation is again the principal use ....Oct.—S 17
Design features ....Oct.—S 18
Optimizing engine power automatically. (charts) ....Mar.— 62
Oscilloscope spots piston blowby while engine operates. R. E. McCarty (charts) Feb.— 74
Why did oil pressure nosedive? M. W. Foster (P.I.) ....Sept.—174
Why wouldn't the diesel start? W. R. Pender (P.I.) ....July—149

F

Feedwater see Water Conditioning

FILTRATION

Filtration — 8-page TD report. Steve Elonka (charts) ....Apr.—201

FUELS

Don't overlook low-grade fuels. J. D. Norris ....Mar.— 66
Fuel oil additives can be useful—how to select and apply the right additive, R. J. Bender (tables) ....May— 76
LILCO trims residual oil problems with low excess air operation and MgO injections. L. M. Exley & others (charts) Apr.— 69
Look at the record before changing diesels to residual fuel. W. T. Dupler Feb.— 67
New York City's tough new air pollution bill, and what it may mean to you. Steve Elonka ....Aug.— 71
Nuclear energy: a new balance. (Ed.) Sept.— 71
Sulfur in fuel oil is objectionable. R. J. Bender ....Apr.— 72

FURNACES

Baffle plates can cure furnace vibration. Dean & Cohan (charts) ....Feb.— 82
New alloys resist fuel oil corrosion in modern furnaces. W. D. Mogerman (chart) ....Aug.— 81

G

GAS BURNING AND HANDLING
Critical flow rates of gases. R. H. Cushing (Data Sheet) ..... Mar.— 76
Cryogenic gases—Cryogenics—8-page TD report. R. J. Bender (chart & tables) July—163
Exhaust heat boilers add to gas turbine efficiency. D. O. Watts (chart) ....July— 55
Fire protection: an unusual method of fire protection for Transco's LNG storage system ..... June— 91

Gas turbines see Turbines, gas

H

HEAT EXCHANGERS
Clean-out openings save $$. L. J. Cormack (P.I.) ..... Nov.—164 A
How can we avoid unnecessary air preheating?—Energy system problem Aug.—168
How can we overcome heat exchanger corrosion?—Energy system problem Mar.—154
Tube repair cost cut in half with a portable radial drill. S. V. Subbarao (P.I.) May—176

HEAT TRANSFER AND FLUID FLOW
Annulus equivalent diameter for heat transfer. F. Caplan (Data Sheet) (chart) ..... Jan.— 75
Designing closed pressure circuits. G. W. Neal (charts) ..... July— 74
Radiant heat transfer between walls. F. Caplan (Data Sheet) (chart) .....July— 80
Temperature-enthalpy diagram helps analyze nuclear reactor steam systems. D. E. Lutz (charts) ..... Aug.— 76
Viscosity conversion chart. H. W. Hamm (Data Sheet) (chart) ..... Aug.— 99

HEATING AND VENTILATION
Air heater calculations. Salva & Crull (nomogram) ..... Apr.— 96
Air in expansion tanks? R. A. Foltz (P.I.) ..... May—178
Electric heat supplies district steam to downtown Toronto. Sinoski & Creighton (chart) ..... Nov.— 84
One boiler does two jobs at Alaska freight terminal. J. S. Miller (P.I.) Dec.—170

HYDRO PLANTS AND EQUIPMENT
Dallas Dam's automatic lubrication system simplifies gate movement. C. W. Grange ..... June— 92
Electric generators report—Generators for hydro stations. F. P. Sullivan (charts) ..... Mar.—S 14
Pumped storage hydro: new plants produce competitive peaking power—8-page TD report. R. K. Evans (charts & table) ..... May—191
Toronto Hydro-Electric system uses electric heat to supply district steam. Sinoski & Creighton (chart) .....Nov.— 84

I

INDUSTRIAL POWER PLANTS
Bourns, Inc.—operating savings make on-site generation an attractive investment. M. Olchoff (charts & tables) Apr.— 88
Clear l-v ground faults with solid-state trips. Bailey & Heilmann (chart & tables) ..... Mar.— 69
Computers analyze building loads—New goals in automation report. F. P. Sullivan (charts) ..... Oct.— 81
Computers at work in steel and power—Richard Thomas & Baldwins' Spencer works, Wales; Park Gate Iron and Steel Co.; Bethlehem Steel's Lackawanna plant ..... Oct.— 88
Economizer preheat cycle raises boiler plant efficiency. Milton Meckler (chart) Feb.— 84
Fire protection for power plants. D. E. Glass ..... Feb.— 86
Kodak Park Works' high-purity steam calls for complete feedwater treatment. S. B. Applebaum (charts & tables) Aug.— 84
Linde Division of Union Carbide Corp's Gary, Indiana, air separation complex—the accent is on system reliability. Gunnar Fog (chart) ..... Aug.— 74

INSTRUMENTS AND CONTROLS
Ac instruments are usually moving-iron vane designs. Norman Peach (chart) Sept.—164
Air-conditioning control—8-page TD report. F. P. Sullivan (charts) ....Sept.—193
Automatic control: how far and how fast—Central station design report. R. K. Evans ..... Dec.—S 22
Automation: what's in it for me? (Ed.) Oct.— 75
Battery-inverter system protects Victor Braunig Power Plant Unit No. 1 in emergencies. Pflieger & Griffith (chart) Dec.— 90
Dc instruments can be modified for ac measurements. Norman Peach ....July—140
Electrodynamic ac instruments have high accuracy. Norman Peach (charts) Nov.—156 D
Equipment and design aids roundup Oct.—138
Fire protection for your power plants. D. E. Glass ..... Feb.— 86
Handy test lamp. W. R. Pender (P.I.) June—222
Maintenance—ISA's First Instrumentation Maintenance Symposium. Steve Elonka ..... July— 72
Measuring cryogenic temperatures. G. H. Hall ..... Aug.— 92
Moving coil unit is a basic instrument. Norman Peach ..... May—168
Multi-computer system for unit control at Willow Glen Station. R. K. Evans (charts) ..... Apr.— 74
New goals in automation—24-page special report (charts) ..... Oct.— 79
Computers analyze building loads. F. P. Sullivan ..... Oct.— 81
The computer—versatile design aid. R. K. Evans ..... Oct.— 85
Computers at work in steel and power Oct.— 88
Automatic water quality measurement. R. H. Marks ..... Oct. 92
Air compressor controls boost output. W. W. Paschke ..... Oct.— 94
Computer needs: available power and freedom from noise. Norman Peach Oct.— 98
How far can power plants be automated? R. J. Bender ..... Oct.—101
Optimizer controls engine power automatically (charts) ..... Mar.— 62
Oscilloscope spots piston blowby while engine operates. R. E. McCarty (charts) Feb.— 74
Radio controls 15-ton cranes .....Feb.— 89
Steam turbines—Comprehensive test program monitors steam turbine performance. G. J. Timmer (charts) ..... Dec.— 84
Steam turbines — How instrumentation helps stretch steam turbine on-line life at Consolidated Edison. G. J. Timmer (chart) ..... Nov.— 91
Tattletale does the trick—recorder helps avert compressor seal failures. L. J. Cormack (P.I.) ..... Mar.—157
Turbine pressure governor controls reactor system temperatures at Argonne National Laboratory. D. E. Lutz (charts) ..... Jan.— 59

INSULATION, ELECTRIC
Ceramic insulation fills tough jobs in today's electric equipment. Norman Peach May— 74
Electric testing. Norman Peach (charts)
Pt. VII Test low-voltage circuit breakers and motor controls with high current ..... Feb.— 79
Pt. VIII Corona tests reveal hidden trouble ..... Apr.— 85
Insulation system speeds motor repair at GE. ..... Dec.— 89

INSULATION, HEAT
Removing foamed-in-place insulation is now easy. Duncan & Hill (P.I.) ..Apr.—180

L

LIGHTING
Equipment and design aids roundup Oct.—224
New lamps give more, better light—variety of light sources to meet increasing demands. F. P. Sullivan (charts) May— 82

LUBRICATION
Automatic lubrication simplifies gate movement at hydro project. C. W. Grange ..... June— 92
Equipment and design aids roundup Oct.—240
Lubricants—16-page special report, reprinted from Aug., 1962. J. J. O'Connor (charts & tables) ..... Aug.—191
Managed lubrication—6-page TD report. J. J. O'Connor (charts) ..... Aug.—185
Municipal power plant shows how to cut operating costs. T. F. Gerrety ....July— 58
Viscosity conversion chart. H. W. Hamm (Data Sheet) (chart) ..... Aug.— 99

M

MAINTENANCE METHODS
Air binding is eliminated in turbine oil tank. R. Foltz (P.I.) ..... Mar.—156
Air conditioning — Preventing water backup when chiller freezes. W. Davis (P.I.) ..... Sept.—176
Batteries—Maintain batteries in top condition. Norman Peach ..... Mar.—148
Bearings
No more $$$ for bearing failures. R. A. Foltz (P.I.) ..... Apr.—180
Reduced clearance stops bearing failure. L. J. Cormack (P.I.) ..... Dec.—169
Boilers
Casings need not corrode. W. A. Haase (P.I.) ..... June—221
Soap in the boiler—more bubbles. L. J. Cormack (P.I.) ..... Jan.—127
Brushes—Know your carbon brushes for longer life and better service. W. E. Heath (charts) ..... July— 68
Cleaning
Boilers—Optimize sootblowing frequency in utility boilers. J. C. O'Brien (chart) ..... May— 78
Boilers—Sootblower maintains deflection control throughout 55-ft. travel May— 79
Heat exchanger clean-out openings save $$. L. J. Cormack (P.I.) ....May—164 A
Inspecting equipment for dirt without shutdown—what would you have done? L. J. Cormack (P.I.) ....Apr.—181
Compressors
The disappearing critical speed? L. J. Cormack (P.I.) ..... Nov.—164
How can I troubleshoot our hermetic compressors?—Energy system problem ..... Apr.—178
How we deflection test our large compressors. S. V. Subbarao (P.I.) ..May—176
Seat refacer avoids removing cylinder. M. L. Leekha (P.I.) ..... Dec.—168
Tattletale does the trick—recorder helps avert compressor seal failures. L. J. Cormack (P.I.) ..... Mar.—157
Cooling systems—Why did our coils fail? L. J. Cormack (P.I.) ..... Feb.—156
Dust Collectors—How maintenance $$$ can give you a "new" mechanical dust collector. R. E. McCarty ..... Feb.— 72
Electrical—Ping-pong balls check foaming at condenser-outlet discharge well. L. Smith (P.I.) ..... July—150
Engines
Deflection gage helps avert breakdowns. L. J. Cormack (P.I.) ..... Aug.—172
Diesel engine trouble shooting. E. E. Kidman (chart) ..... Nov.— 82
Why did oil pressure nosedive? M. W. Foster (P.I.) ..... Sept.—174
Why wouldn't the diesel start? W. R. Pender (P.I.) ..... July—149
Equipment and design aids roundup Oct.—238
Filters
Napkins—latest American invention. Eugene Gore (P.I.) ..... Aug.—172
Napkins to the rescue—maintaining oil-free air for air compressors. L. J. Cormack (P.I.) ..... Apr.—182
Generators
Chips in the generator—what would you have done? R. A. Foltz (P.I.) July—149
How should I schedule maintenance for our standby generator set?—Energy system problem .....May—172
Stops electron revolt. W. R. Pender (P.I.) ..... Jan.—127
What causes our stator winding failures?—Energy system problem ..Feb.—152
Heat exchangers—Tube repair costs cut in half with a portable radial drill. S. V. Subbarao (P.I.) ..... May—176
Instruments — Instrumentation maintenance, 1966—highlights of ISA's First Instrumentation Maintenance Symposium. Steve Elonka ..... July— 72
Insulation—Removing foamed-in-place insulation is now easy. Duncan & Hill (P.I.) ..... Apr.—180
Light bulbs KO problem and are kept as permanent equipment. L. J. Cormack (P.I.) ..... Mar.—156
Lubrication
Lubricants—16-page special report, reprinted from Aug., 1962. J. J. O'Connor (charts & tables) ..... Aug.—191
Managed lubrication—6-page TD report. J. J. O'Connor (charts) ..... Aug.—185
Machines—Are your machine repair costs too high? H. Q. Duguid ..... Jan.— 66
Mechanical transmissions—Diesel starting fluid is good penetrant. L. J. Cormack (P.I.) ..... July—148
Motors
Corrugator's motor damaged by excess current—what would you have done? R. A. Foltz ..... Mar.—157
Insulation system speeds motor repair Dec.— 89
Locating high-voltage "opens". L. J. Cormack (P.I.) ..... Feb.—156
Packing—We stretched our hydraulic packing. L. J. Cormack (P.I.) ....Mar.—158
Piping
Air in expansion tanks? R. A. Foltz (P.I.) ..... May—178
Expansion joint for dust-collector ducts. A. F. Westergard (P.I.) .....Feb.—156
Preventive maintenance
Clear l-v ground faults with solid-state trips. Bailey & Heilman (chart & tables) ..... Mar.— 69
Correct water treatment can minimize caustic stress corrosion. Henry Suss (chart) ..... Mar.— 54
Electric testing. Norman Peach (charts)

(TD) Today's Development (Ed.) Editorial (P.I.) Practical Ideas

Pt. VII Test low-voltage circuit breakers and motor controls with high current .....Feb.— 79
Pt. VIII Corona tests reveal hidden trouble .....Apr.— 85
1966 Maintenance Conference updates PM thinking. Steve Elonka (table) June— 79
Oscilloscope spots piston blowby while engine operates. R. E. McCarty (charts) .....Feb.— 74
Portable air tank to check for proper calibration. A. Gose (P.I.) ....Jan.—126

Pumps
Centrifugal pumps—The suction side of centrifugal pumps. Harold Woodhouse (charts) .....May— 71
Leak in oil-reservoir cooling coil—What would you have done? J. Wells May—164 A
Protect feed pumps against power failure. A. R. Bush (chart) .....Mar.— 64
Ten ways to murder your pump. J. H. Biheller .....Aug.— 78
Why did our large cooling-tower pumps keep failing? L. J. Cormack (P.I.) June—220
Why did the pump keep jamming? B. K. Shukla (P.I.) .....Apr.—181
Why did the pump stop pumping? W. R. Pender (P.I.) .....Apr.—181
Seals—Venting system prevents fluid leakage around piston seals. W. F. MacGlashan (P.I.) .....May—176
Tanks—How to protect condensate tanks against corrosion. Applegate & Applegate .....Mar.— 59
Turbines
Overlay job saves $14,000. M. Shaw (P.I.) .....Nov.—164
Resistor burns out—What would you have done? R. E. Ethridge (P.I.) June—221
Steam turbines — Comprehensive test program monitors steam turbine performance. G. J. Timmer (charts) Dec.— 84
Steam turbines — Instrumentation stretches steam turbine on-line life at Consolidated Edison. G. J. Timmer (chart) .....Nov.— 91
Turbine casing bolts. H. C. Bosley (P.I.) .....June 220
What causes our turbine blade failures? —Energy system problem .....June—214
Valves
Globe valve becomes handy expansion valve. A. Quick (chart) (P.I.) Dec.—168
Leaking ball valves on chemical pumps. L. J. Cormack (P.I.) .....Nov.—164 B
Valve cage breaks—what would you have done? E. M. P. Evans (P.I.) Dec.—169

MANAGEMENT
Do your utility plant trainees push brooms? W. Exton, Jr. .....June— 88
Duke Power trains the engineering staff for its nuclear plant—organization chart. Steve Elonka .....Dec.— 79
How far can power plants be automated? —New goals in automation report. R. J. Bender (chart) .....Oct.—101
How our plant camera pays off. L. J. Cormack .....Sept.— 91
Maintenance Conference updates PM thinking. Steve Elonka (table) ...June— 79
Managed lubrication—6-page TD report. J. J. O'Connor (charts) .....Aug.—185
Water—48-page special report (charts, table, maps) Water management June—S 39

Marmaduke Surfaceblow, see Surfaceblow, Marmaduke

MATERIALS
Cation exchange resin minimizes organic fouling. Hetherington & Fries (charts) Sept.— 75
Ceramic insulation fills tough jobs in today's electric equipment. Norman Peach May— 74
Copper alloys' role in desalination. R. S. Burr (chart & tables) .....Dec.— 86
Equipment and design aids roundup Oct.—236
Insulating resin speeds motor repair Dec.— 89
Manganese additive reduces SO_3 in flue gases. A. R. Belyea (chart) .....Nov.— 80
New alloys resist fuel oil corrosion. W. D. Mogerman (chart) .....Aug.— 81
Weak-base resin now makes three-bed demineralizing economical. Heatherington & Downing (charts & tables) Nov.— 76

MATERIALS HANDLING
Cranes are radio controlled .....Feb.— 89
Fire protection: an unusual method of fire protection for Transco's LNG storage system .....June— 91
Large field-erected boiler moved on skids Nov.— 81
Transporting a big storage tank—what would you have done? E.M.P. Evans (P.I.) .....Aug.—173

MECHANICAL TRANSMISSIONS
Crankshaft deflection gage helps prevent breakdowns. L. J. Cormack (P.I.) Aug.—172
Equipment and design aids roundup Oct.—237

MODERNIZATION
Automatic lubrication simplifies gate movement at hydro project. C. W. Grange .....June— 92

MOTORS AND MOTOR CONTROL
Asynchronous machines get wider use. B. G. Waurick (charts) .....Aug.— 88
Corrugator's motor damaged by excess current—what would you have done? R. A. Foltz .....Mar.—157
Equipment and design aids roundup for prime movers .....Oct.—234
Examine starting of large motors when you plan on-site generation. J. E. Doescher (charts) .....Sept.— 88
How do we predict voltage drop?—Energy system problem .....June—216
How starting large ac motors can cause severe voltage dips. J. E. Doescher (charts & tables) .....Feb.— 69
Insulation system speeds motor repair Dec.— 89
Know your carbon brushes for longer life and better service. W. E. Heath (charts) .....July— 68
Rpm vs. sheave size. J. D. Constance (Data Sheet) (nomograph) .....Feb.— 94
Test low-voltage circuit breakers and motor controls with high current. Norman Peach (charts) .....Feb.— 79
What causes our stator winding failures? —Energy system problem .....Feb.—152

N

NOISE
Computers: freedom from noise is a key need—New goals in automation report. Norman Peach (charts) .....Oct.— 98

NUCLEAR NOTES
Nuclear notes. R. J. Bender
Jan. 72, Feb. 92, Mar. 74, Apr. 94, May 92, June 98, July 78, Aug. 96, Sept. 98, Oct. 103, Nov. 96, Dec.—100

O

OIL BURNING AND HANDLING
Air binding is eliminated in turbine oil tank. R. Foltz (P.I.) .....Mar.—156
Fuel oil additives can be useful. R. J. Bender (tables) .....May— 76
LILCO trims residual oil problems. L. M. Exley & others (charts) .....Apr.— 69
Look at the record before changing diesels to residual fuel. W. T. Dupler Feb.— 67
Low-excess air and sonic atomization team up. R. J. Bender (chart) ....July— 71
Manganese additive reduces SO_3 at Consolidated Edison. A. R. Belyea (chart) Nov.— 80
Municipal power plant shows how to cut operating costs. T. F. Gerrety ....July— 58
New alloys resist fuel oil corrosion in modern furnaces. W. D. Mogerman (chart) .....Aug.— 81
No more oil spills. P. S. Finneral (P.I.) Jan.—126
Sulfur in fuel oil is objectionable. R. J. Bender .....Apr.— 72

P

PACKING, GASKETS AND SEALS
Tattletale recorder helps avert compressor seal failures. L. J. Cormack (P.I.) Mar.—157
Vented piston seal. W. F. MacGlashan (P.I.) .....May—176
We stretched our hydraulic packing. L. J. Cormack (P.I.) .....Mar.—158
Why did oil pressure nosedive? M. W. Foster (P.I.) .....Sept.—174

PHOTOGRAPHY
How our plant camera pays off. L. J. Cormarck .....Sept.— 91

PIPING
Another expansion joint for ducts. A. F. Westergard (P.I.) .....Feb.—156
Ball joints solved our expansion problem. C. Sallman (P.I.) .....Sept.—174
Equipment and design aids roundup Oct.—162
Piping harness stress analysis improves gimbal ring design. A. A. Samiloff July— 66
Piping stress analysis simplified. Frederick Beck (charts and tables)
Pt. I .....Sept.— 93
Pt. II .....Dec.— 92
Saturated steam flow in pipes. F. Caplan (Data Sheets) (nomogram) .....Dec.—102
20-ft long piping needs beveling—what would have done? F. Nelson (P.I.) Sept.—175
What caused corrosion in our condensate lines? L. H. Bauer (P.I.) .....Mar.—158

POWER SERVICES
The accent is on system reliability at Linde's air separation complex. Gunnar Fog (chart) .....Aug.— 74
Is your electric power good enough?—how monetary interruptions affect electronic equipment (charts & tables) ...July— 62
Northeast Blackout—November 9th: one year later (Ed.) .....Nov.— 69
Northeast Blackout—one year later. F. P. Sullivan .....Nov.— 88
Northeast Blackout triggers plans for firm power supplies—8-page TD report. J. J. O'Connor (charts & map) .....Jan.—141
System neutral grounding improves service continuity. D. W. Jackson (chart & table) .....June— 84
Unattended unit to provide interim base-load service at Bay d'Espoir .....Apr.— 80

Process steam see Steam

PUMPS
Boiler feed pump reliability—What price reliability? I. J. Karassik (charts & tables) .....Apr.— 81
Centrifugal pumps—The suction side of centrifugal pumps. Harold Woodhouse (charts) .....May— 71
Designing closed pressure circuits. G. W. Neal (charts) .....July— 74
Equipment and design aids roundup Oct.—176
Integral motor pumps or separate motor pumps, how do they compare? Steve Elonka .....Sept.— 84
It pays to protect your feed pump. A. R. Bush (chart) .....Mar.— 64
Pumped storage hydro—pumping systems —8-page TD report. R. K. Evans (charts & table) .....May—191
Pumps—an 8-page TD report. R. H. Marks (charts) .....Feb.—177
Ten ways to murder your pump. J. H. Biheller .....Aug.— 78
Vertical pumps now offer long life in abrasive slurries. J. I. Dalstad ...Aug.— 90
Why did our large cooling-tower pumps keep failing? L. J. Cormack (P.I.) June—220
Why did the pump keep jamming? B. K. Shukla (P.I.) .....Apr.—181
Why did the pump stop pumping? W. R. Pender (P.I.) .....Apr.—181
Why won't our centrifugal pump drain the tank?—Energy system problem July—144

R

REFRIGERATION
Cryogenics—8-page TD report. R. J. Bender (chart & tables) .....July—163
How to measure cryogenic temperatures. G. H. Hall .....Aug.— 92
Preventing water backup when chiller freezes. W. Davis. (P.I.) .....Sept.—176

S

SAFETY
Does this neutral bus make a proper equipment ground? — Energy system problem .....Sept.—170
Fire protection: an unusual method of fire protection for Transco's LNG storage system .....June— 91
Insurance—boiler and machinery insurance can avoid the ruinous expense of a disaster. W. H. Johnston .....Feb.— 76
Northeast Blackout—November 9th: one year later—little change toward assuring public safety (Ed.) .....Nov.— 69
Northeast Blackout: one year later—little new legislation to improve public safety. F. P. Sullivan .....Nov.— 88
Nuclear power plants in cities now feasible, symposium says .....June— 82
Protect your power plants from fire. D. E. Glass .....Feb.— 86
Safety valves can be made safer. Dowies & Garner (chart) .....Sept.— 92
Stop valve below safety valve? L. J. Cormack (P.I.) .....May—176
Safety valve again . . . A. A. Arena, A. L. Kohan (P.I.) .....Aug.—172
System neutral grounding aids safety. D. W. Jackson (chart & table) ..June— 84

SPEAKING OF POWER (A. DEPT.)
Jan. 2, Feb. 2, Mar. 2, Apr. 2, May 2, June 2, July 2, Aug. 2, Sept. 2, Oct. 2, Nov. 2, Dec.— 2

SPRINGS
Coil-spring calculations. R. Brunner (Data Sheet) (nomogram) .....Sept.—101

STACKS
Smoke tracking helps determine optimum chimney height. A. G. Kelly (chart) June— 94
Switzerland's Vouvry Station: an unusual approach to air pollution control. R. J. Bender .....Dec.— 83

STANDARDIZATION
Pollution-control standards: an engineering challenge (Ed.) .....Feb.— 63

STEAM

Can I control superheater temperature with saturated steam?—Energy system problem ..... Sept.—168
Central station design—32-page special report. R. K. Evans (charts & tables) ..... Dec.—S 1
How steam generators meet today's demands ..... Dec.—S 10
Turbine design evolves to match steam conditions ..... Dec.—S 18
Electric heat supplies district steam to downtown Toronto. Sinoski & Creighton (chart) ..... Nov.— 84
Equipment and design aids roundup for steam generation systems ..... Oct.—196
Heat recovery boilers add to gas turbine efficiency. D. O. Watts (chart) .... July— 55
High-purity steam calls for complete feedwater treatment. S. B. Applebaum (charts & tables) ..... Aug.— 84
LOX-hydrocarbon unit generates instant steam ..... May— 89
New frontiers for energy—India's world symposium on design and management of steam-electric stations (Ed) .... July— 51
1966 Energy Systems Design Survey (charts & tables)
Larger, higher pressure boilers reflect optimistic industrial planning .. Oct.—S 24
Design features ..... Oct.—S 26
Industrial turbines get bigger .... Oct.—S 32
Optimize sootblowing frequency in utility boilers. J. C. O'Brien (chart) .. May— 78
Saturated steam flow in pipes. F. Caplan (Data Sheets) (nomogram) ..... Dec.—102
Sootblower maintains controlled deflection throughout 55-ft. travel ..... May— 79
Temperature-enthalpy diagram helps analyze nuclear reactor steam systems. D. E. Lutz (charts) ..... Aug.— 76

SUBSTATIONS AND SWITCHGEAR

Transformers—8-page TD report. Norman Peach (charts) ..... Nov.—181

SURFACEBLOW, MARMADUKE

Marmy's card-carrying robots ..... Sept.—146
Marmy's crawfish ..... May—158
Marmy's fruit salad ..... Apr.—164
Marmy's iron ship ..... June—194
Marmy's mammoth blowtorch ..... July—126
Marmy's motorsitos ..... Feb.—142
Marmy's pitted runner ..... Mar.—134
Marmy's redheads ..... Nov.—146
Marmy's scavengers ..... Jan.—114
Marmy's unwilling turbine ..... Dec.—146

SYSTEMS DESIGN

Air conditioning control: on-line computerized control gains interest—8-page TD report. F. P. Sullivan (charts) Sept.—193
Central station design—32-page special report. R. K. Evans (charts & table) ..... Dec.—S 1
The spectacular story of size .... Dec.—S 2
Site selection—new factors ..... Dec.—S 6
How steam generators meet today's demands ..... Dec.—S 10
Nuclear generation reaches for new goals ..... Dec.—S 14
Turbine design evolves to match steam conditions ..... Dec.—S 18
Automatic control: how far and how fast? ..... Dec.—S 22
Plant auxiliaries match size with reliability ..... Dec.—S 26
Designing closed pressure circuits. G. W. Neal (charts) ..... July— 74
Designing hot water systems. W. J. O'Brien Pt. I ..... Jan.— 67
New frontiers for energy—India's world symposium on design and management of steam-electric stations (Ed) ... July— 51
New goals in automation—24-page special report (charts) ..... Oct.— 79
Computers analyze building loads. F. P. Sullivan ..... Oct.— 81
The computer—versatile design aid. R. K. Evans ..... Oct.— 85
Computers at work in steel and power ..... Oct.— 88
Automatic water quality measurements. R. H. Marks ..... Oct.— 92
Today, air compressor controls can boost system efficiency. W. W. Paschke ..... Oct.— 94
Availability of power and freedom from noise are key computer needs. Norman Peach ..... Oct.— 98
How far can power plants be automated? R. J. Bender ..... Oct.—101
1966 Energy Systems Design Survey (charts & tables) ..... Oct.—S 1
An overall look at trends in eight energy system areas ..... Oct.—S 2
On-site generation offers operating savings at Bourns. M. Olchoff (charts & tables) ..... Apr.— 88
Piping harness stress analysis improves gimbal ring design. A. A. Samiloff July— 66
Piping stress analysis simplified. Frederick Beck (charts & tables)
Pt. I ..... Sept.— 93
Pt. II ..... Dec.— 92
System neutral grounding. D. W. Jackson (chart & table) ..... June— 84
Water—48-page special report (charts, table, maps) ..... June—S 1
Why water shortages? ..... June—S 3
The world of water ..... June—S 7
Surface water ..... June—S 15
Ground water ..... June—S 27
Ocean waters ..... June—S 35
Water management ..... June—S 39
What price reliability? I. J. Karassik (charts & tables) ..... Apr.— 81

T

TEMPERATURE

Quickly convert between centigrade and Fahrenheit. Sidney Austin (Data Sheet) ..... Nov.— 98

THERMODYNAMICS

Economizer preheat cycle raises boiler plant efficiency. Milton Meckler (chart) ..... Feb.— 84
How can we avoid unnecessary air preheating?—Energy system problem Aug.—168
Temperature-enthalpy diagram helps analyze nuclear reactor steam systems. D. E. Lutz (charts) ..... Aug.— 76

TRAINING

Developing nations pose challenges for energy-systems engineers. Steve Elonka ..... Nov.— 73
Do your utility plant trainees push brooms? W. Exton, Jr. ..... June— 88
How Duke Power trains nuclear plant designers and operators. Steve Elonka (chart) ..... Dec.— 79

TRANSFORMERS

Correctly connect transformers. Lloyd McWilliams ..... May— 80
Transformers—8-page TD report. Norman Peach (charts) ..... Nov.—181

TURBINES, GAS

Electric generators report—Generators for steam and gas turbine drives. F. P. Sullivan (charts) ..... Mar.—S 5
Exhaust heat boilers add to gas turbine efficiency. D. O. Watts (chart) ...July— 55
Gas turbines can show significant economy driving pumps and fans. J. A. Kozlowski (tables) ..... Sept.— 82
Gas turbines—international conference in Zurich (Ed.) ..... May— 63
Increase gas turbine capability to reduce your plant costs. Hiniker & Wilson (charts) ..... Apr.— 78
1966 Energy Systems Design Survey (charts & tables)
Design features ..... Oct.—S 14
50 selected projects typify a wide range of industrial applications Oct.—S 16
What causes our turbine blade failures? —Energy system problem ..... June 214

TURBINES, STEAM

Condenser isolation valve blocks steam warmup—what would you have done? D. E. Lutz ..... Feb.—157
Design evolves to match steam conditions—Central station design report. R. K. Evans ..... Dec.—S 18
Electric generators report—Generators for steam and gas turbine drives. F. P. Sullivan (charts) ..... Mar.—S 5
1966 Energy Systems Design Survey (charts & tables)
Larger, higher pressure boilers reflect optimistic industrial planning Oct.—S 24
Design features ..... Oct.—S 26
Industrial turbines get bigger ... Oct.—S 32
Overlay job saves $14,000. M. Shaw (P.I.) ..... Nov.—164
Relocating used machinery benefits both seller and buyers ..... Mar.— 68
Steam turbine refuses to start—what would you have done? D. E. Lutz (P.I.) ..... Feb.—157
Steam turbines
Instrumentation stretches steam turbine on-line life at Consolidated Edison. G. J. Timmer (chart) ....Nov.— 91
Comprehensive test program monitors steam turbine performance. G. J. Timmer (charts) ..... Dec.— 84
Steam turbines cut plant operating costs. R. K. Evans (table) ..... Mar.— 56
Turbine pressure governor controls reactor system temperatures at Argonne National Laboratory. D. E. Lutz (charts) ..... Jan.— 59

V

VALVES

Ball valves again. L. J. Cormack (P.I.) ..... Nov.—164 B
Butterfly valves—primer for selection and application. A. J. Hanssen (charts) ..... Jan.— 62
Equipment and design aids roundup Oct.—162
Globe valve used as handy expansion valve keeps ammonia line going. A. Quick (chart) (P.I.) ..... Dec.—168
Safety valves can be made safer. Dowies & Garner (chart) ..... Sept.— 92
Stop valve below safety valve? L. J. Cormack (P.I.) ..... May—177
Safety valve again. . . . A. A. Arena, A. L. Kohan (P.I.) ..... Aug.—172
Valve cage breaks—What would you have done? E. M. P. Evans (P.I.) ..... Dec.—169

VIBRATION

Baffle plates cure boiler vibration. Dean & Cohan (charts) ..... Feb.— 82
Compressor startup—the disappearing critical speed??? L. J. Cormack (P.I.) ..... Nov.—164
Sonic atomization and low excess air team up. R. J. Bender (chart) ..... July— 71
We stopped vibration in a hotel's air conditioning system. W. R. Pender (P.I.) ..... July—148

W

WASTE TREATMENT

Automatic water quality measurement—New goals in automation report. R. H. Marks (chart) ..... Oct.— 92
Detergent suds? Not now! E. T. Bredar (P.I.) ..... Jan.—128
How we converted to burn wood waste. W. R. Pender (P.I.) ..... Dec.—170
Pollution—an engineer speaks out—views of Calgon's Dr. Partridge (Ed.) ..Dec.— 75
Treating spent nitric acid for disposal—What would you have done? L. J. Cormack (P.I.) ..... May—177
Water—48-page special report (charts, tables, maps) ..... June—S 1
Water pollution control. T. F. Dalton ..... Mar.— 51

WATER CONDITIONING

Automatic water quality measurement—New goals in automation report. R. H. Marks (chart) ..... Oct.— 92
Cation exchange resin minimizes organic fouling. Heatherington & Fries (charts) ..... Sept.— 75
Con Edison's Ravenswood checks water quality at every step. Peri & Bogin (chart) ..... Jan.— 53
Correct water treatment can minimize caustic stress corrosion—Purcell-Whirl and other methods. Henry Suss (chart) ..... Mar.— 54
Desalination—The role of copper alloys in desalination. R. S. Burr (chart & tables) ..... Dec.— 86
Designing hot water systems. W. J. O'Brien (charts) Pt. I ..... Jan.— 67
Equipment and design aids roundup—Oct.—176
Filtration—8-page TD report. Steve Elonka (charts) ..... Apr.—201
High-purity steam calls for complete feedwater treatment. S. B. Applebaum (charts & tables) ..... Aug.— 84
How can we prolong demineralizer resin life—Energy system problem ..... Dec.—164
How we saved money on cooling water control. P. Harris (P.I.) ..... July—150
Pollution—an engineer speaks out—views of Calgon's Dr. Partridge (Ed.) ..Dec.— 75
Three-bed demineralizing system is the optimum arrangement. Heatherington & Downing (charts & tables) ..... Nov.— 76
Water—48-page special report (charts, table, maps) ..... June—S 1
Water pollution control. T. F. Dalton ..... Mar.— 51

WATER SUPPLY

Automatic water quality measurement—New goals in automation report. R. H. Marks (chart) ..... Oct.— 92
Cation exchange resin minimizes organic fouling. Heatherington & Fries (charts) ..... Sept.— 75
Designing hot water systems. W. J. O'Brien (charts) Pt. I ..... Jan.— 67
How we saved money on cooling water control. P. Harris (P.I.) ..... July—150
Pollution—an engineer speaks out—views of Calgon's Dr. Partridge (Ed.) ..Dec.— 75
The role of copper alloys in desalination. R. S. Burr (chart & tables) .....Dec.— 86
